

Application No.: 09/990,327

Docket No.: 05525-00003-US

identification of the user by receiving wireless device identification information transmitted by the wireless device or calls for responding to identification of the user by receipt of wireless device identification information.

Applicant has reviewed the summary of each of the references which were not relied on and agrees those references are less pertinent to the claimed subject matter.

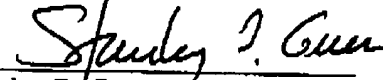

Inasmuch as Claims 99-110 depend on one of the independent claims 9, 17, 26, 35, 44, 53, 54, 62, 71, 80, 89 or 98, Applicant submits that the claims are patentable for each of the reasons given with respect to the respective parent claims, as well as with respect to the fact that the sole reference does not teach that the wireless device is a telephone.

In view of the above, each of the presently pending claims in this application is believed to be in immediate condition for allowance. Accordingly, the Examiner is respectfully requested to pass this application to issue.

Dated: August 20, 2003

Respectfully submitted,

By
